

Remote Temperature Sensor with Button ACCTSENWB

STANDARD FEATURES:

- Sensor is compatible with most commercial Explorer and ColorTouch thermostats
- Includes an override button to put ColorTouch thermostats into the occupied mode during an unoccupied period
- This sensor can be set to control, monitor or average with the thermostat
- Averaging is accomplished by wiring 1, 4 or 9 sensors in a series-parallel circuit
- Use 18 – 22 gauge 2 conductor unshielded thermostat wire
- Maximum total distance between sensor and thermostat is 200ft
- Measurement range is -40F ~ 131F
